DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1, 3-4, 13-15, 17-21, 34-44, drawn to a CT detector, classified in class 378, subclass 19.
- II. Claims 22 and 24-33, drawn to a method of CT detector manufacturing, classified in class 250, subclass 367.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the CT detector can be made by not forming a substrate of scintillation material nor not disposing a composite layer in the reflective layer (see attached references, Iwanczyk et al. (US 5773829), Tsunota et al. (US 20030178570A1), Rougeot et al. (US 5208460) or Tsunota et al. (US 6495845B1).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Claim Objections

Claims 15, 24-25 and 27 are objected to because of the following informalities:

In claim 15 at line 21, "the composite layer" lacks proper antecedent basis.

In claim 24 at line 1-2, "the step of pixelating" lacks proper antecedent basis.

In claim 27 at line 1-2, "the step of depositing" lacks proper antecedent basis.

Appropriate correction is required.
